

# Taormina Historic District

## EXTERIOR PAINT COLORS

The original intent of the community was to foster a sense of quietude and harmony. While the original CC&Rs (Part 1, Section 2-e) stipulated that the “Exterior color of the stucco of the homes must be in sand color or off-white tones” the acceptable color spectrum has been expanded, now to be defined as “earth tones.” Both the exterior paint color and any shutters must be chosen from the colors presented or a variation thereof. The following pages represent a variety of acceptable colors.

All of the colors represented are of paint manufactured during 2012–2015 by the Benjamin Moore Company (Montvale, NJ). Each color is identified by its name and company ID number.

The colors can easily be matched by other manufacturers and paint stores.

Exterior house colors of Taormina homes are considered as accepted, as of the date of the Historic District Designation, until such time as the structure is repainted when this design element will apply.

These color guidelines do not apply to “trim” or other “accent” features.

*( The color blocks shown below are ‘scanned’ representations of color blocks on file with the City of Ojai. It is strongly recommended that a property owner visit a paint dealer or the City and view the actual color block. )*
